Project**

Matching Game

-Players will find matching image pairs within a specific time limit
-Technologies/Languages Used: Java, Firebase
-Github: https://github.com/DatAmazon/android_matching-game

Oct - 2022

Event-Driven Programming Major Project

Apr - 2022

Algorithms Practice

Dec - 2021

Practice HTML, CSS, Javascript

May - 2021

Practive SQL Server

Jan - 2021

TeachingManagement Application

- Faculty Teaching Schedule Management Application
- Technologies/Languages Used: Windows Form (.Net Framework), C#, SQL Server
- Github: https://github.com/DatAmazon/winform_quan_ly_giang_day_giao_vien

Algorithm Implementation in C# Without Using Libraries

- Resolve 55 algorithmic problems using the C# language without using C# libraries
- Technologies/Languages Used: C#
- Github: <https://github.com/DatAmazon/C-Sharp-Algorithm-Exercises>

Clone Shopee homepage

- Replicate the front-end of the Shopee homepage.
- Technologies/Languages Used: HTML, CSS, Javascript
- Github: https://github.com/DatAmazon/clone_font_end_shopee

Practive SQL Server

- SQL Server code for managing teaching faculty in TeachingManagement, managing computer in ComputerStoreManagement, and managing crochet in CrochetStoreManagement (following 3NF normalization). Implementing select/insert/update/delete statements, utilizing procedures, triggers...
- Technologies/Languages Used: SQL Server
- Github: <https://github.com/DatAmazon/SQL-Server-code>

Introduction

Self

- Capable of reading documents in English.
- Familiar with system design and normalization up to 3rd normal form (3NF).
- Knows how to organize tasks effectively.
- Diligent in work and constantly seeks to learn about relevant technologies.
- Highly responsible in the workplace.
- Regarded by many as active, approachable, and friendly.

Short-term goal:

- Apply the knowledge acquired in the classroom and self-learning to real-world projects.
- Become a professional .NET developer (ASP.NET Core MVC, C#, SQL Server), creating high-quality products that generate significant profits for the company.

Long-term goal

- Study and analyze the strengths and weaknesses of products to apply them effectively in the workplace.
 - Enhance my knowledge base to achieve higher accomplishments and levels in the future.
- Gain mastery over technologies, come up with innovative ideas, and develop corresponding products based on those ideas.
